E-Verbatim Records

E-Verbatim Records provides the user, who is usually an MP or a staff member, the ability to look up speeches made in the plenary hall and in most meeting rooms in the Parliament building.

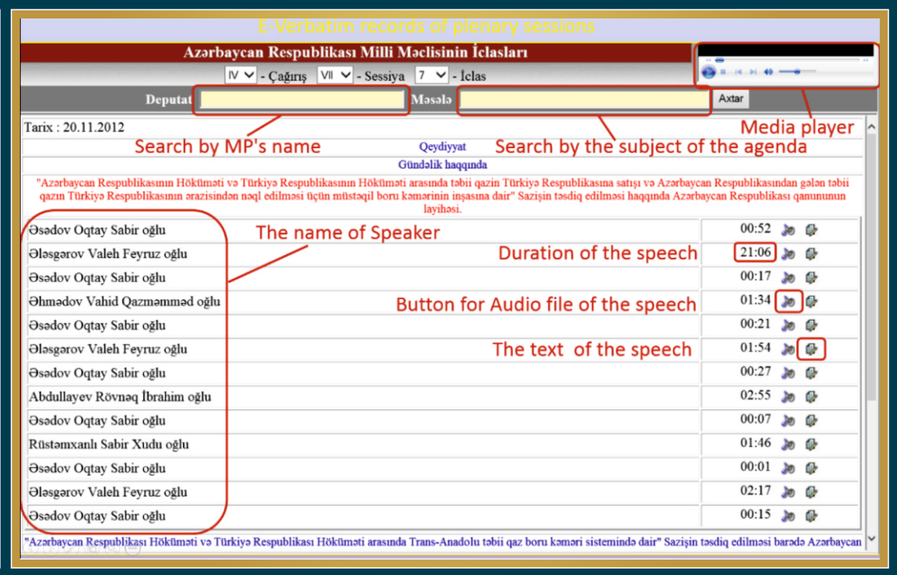

The information is available almost immediately after the presenter stops speaking and it provides the user with accurate and original speech in voice format.

The speeches made by MPs and Parliament guests can be searched by speaker, date, legislative convocation, legislative session and subject matter.
