

Video Capturing Software

Requirement:

A computer with Video input adapter (TV tuner, TV Card) with Composite video input or just with webcam and Standard audio input

Functions:

Video capture of meeting in mpg format.

Instructions:

1. Create directory for the video files. For example d:\Video
2. Edit the configq.INI file, 'yol' field with the following folder d:\Video.
3. Run the video_record.exe
4. Enjoy!

Note: Preview is just testing the program if it works ok.

You can start the video recording by clicking "Start" button.

Video recording can be stopped by clicking "Stop" button.
